

(a)

regulated from outside

**(b)** $a(t)$ solved from E4 + E5'**(c)**

what an interior body reads

1. distances: $r = \chi a(t)$
2. wavelength: $1+z = a_{obs}/a_{emit}$
3. clocks: τ/t from $\psi = W/Kt$
4. light speed: $c_{loc} = c_0 e^{-2\psi}$
5. share: $\phi_B = W_B/(W_B + w_{local})$
6. peculiar velocity: $w = v - u_B$
