scale factor  $a$

— measured,  $D/Kt = 0.3$

— measured,  $D/Kt = 0.9242$

— measured,  $D/Kt = 1.5$

..... analytic  $2(D/Kt) a^{-dP}$

- - - control  $c_{loc} \sim 1/W$  (identically  $dP=1$ )

— calibration  $a=2, D/Kt=0.9242$
