scale factor a

— measured, $D/Kt = 0.3$

— measured, $D/Kt = 0.9242$

— measured, $D/Kt = 1.5$

..... analytic $2(D/Kt) a^{-dP}$

- - - control $c_{loc} \sim 1/W$ (identically $dP=1$)

— calibration $a=2, D/Kt=0.9242$
